Shopify Development, Shopify Theme Customization, Shopify store setup, Product Catalogue management, store optimization, Conversion Rate Optimization, SEO, Payment Gateway Integration

PROJECTS

E-Clinic

Aug. 2025

Developed E-Clinic, a responsive healthcare management platform designed to streamline patient and clinic operations through a user-friendly digital interface. The system was built using HTML, CSS, JavaScript, PHP, MySQL, and XAMPP, following full-stack web development practices.

Key features include patient registration and management, appointment scheduling, secure data storage, medical record management, and an intuitive dashboard for efficient clinic administration. The platform focuses on improving healthcare accessibility, reducing manual processes, and enhancing the overall patient experience through a centralized and secure system.

Technologies Used: HTML5, CSS3, JavaScript, PHP, MySQL, XAMPP, Git/GitHub, Responsive Web Design.

Role: Full-Stack Developer – Responsible for system design, database development, frontend implementation, backend functionality, testing, and deployment.

RESUME WEBSITE

Jan. 2026

Developed a full-stack resume services platform that connects job seekers with professional resume specialists for resume writing, revamping, and career profile optimization. The platform enables users to create accounts, submit resume requests, communicate service requirements, and securely make payments online. Built using HTML, CSS, JavaScript, PHP, MySQL, and XAMPP, the system features user authentication, service management, database integration, and

a responsive user interface designed to streamline the resume enhancement process and improve job seekers' career prospects.

Technologies Used: HTML, CSS, JavaScript, PHP, MySQL, XAMPP, Git/GitHub, README Documentation.

ATTENDANCE

Nov. 2023

Student Attendance Management System

Designed and developed a web-based attendance management platform using HTML, CSS, JavaScript, PHP, MySQL, and XAMPP. The system enables students to mark attendance digitally, while allowing lecturers to monitor, manage, and generate attendance records through a centralized dashboard. Improved attendance tracking efficiency, reduced manual record-keeping, and enhanced data accuracy through automated database management.

STYLISH ECOMMERCE

Mar. 202

Stylish Ecommerce (E-commerce Web Application)

Designed and developed a fully functional e-commerce platform, Stylish Ecommerce, focused on online shoe sales. Built using HTML, CSS, JavaScript, PHP, MySQL, and XAMPP, the platform enables customers to browse products, add items to their cart, create accounts, and complete purchases directly through the website. Integrated the Paystack Payment API to provide secure online payment processing and a seamless checkout experience. Implemented responsive design principles, product management features, user authentication, database-driven functionality, and order processing to deliver a complete end-to-end online shopping solution.
